

Week 5, September 30, 2026

Main topics

- Mini-project 1
- Beyond standard Tikhonov regularization

Material

Everything from weeks 1-4.

New material this week: P. C. Hansen, *Discrete Inverse Problems: Insight and Algorithms*, Sections 8.1 and 8.6. The slides are in the file Chap8.pdf.

Program

13:00-15:50 Work on mini-project 1

15:50-17:00 Generalized Tikhonov and Total Variation regularization

Mini-project 1

You will find the project in learn/assignments. You can work with the problems during the week, and discuss challenges with fellow students and Andreas will be around in 303A/45. The deadline for submission of solutions is set to Monday October 5. Submit as a group or individually.
